Work Experience

Storm Flag Games

Dedham, MA

Associate Game Engineer

July 2025 - Present

- Contributed to 4 TypeScript and Unity games and worked on live support tickets for other finished projects
- Accelerated my daily workflow with AI-assisted development (using Claude Code) to speed up writing boilerplate code and researching common issues
- Identified and resolved bugs and inconsistencies to improve the quality of builds sent to clients
- Collaborated with artists to complete tasks related to hooking up visuals and animations
- Debugged problems in WebGL games both on PC and on mobile to solve problems that only occur on certain platforms

Associate Game Engineering Co-op

July 2024 - December 2024

- Worked on at least 4 web-based video games using Typescript with a cross-disciplinary team of programmers and artists
- Programmed 5 minigames for offline testing of a new slots game being developed at the company
- Developed a system of scripts to help manage visuals and animations for a slots game
- Effectively used Git, GitHub, Jira, and Slack as well as participated in daily standup to work with my team

Medtronic

Boston, MA

Software Engineering, Extended Reality Co-op

July 2023 - December 2023

- Programmed an annotation system in Unity with C# using the model-view-controller design pattern
- Used Jira tickets to receive tasks and post tasks for other team members
- Implemented requests from a project manager into a previously started project
- Documented changes made to the project's repository in an internal wiki page

Education

Northeastern University, Boston, MA

September 2021 – May 2025

Khoury College of Computer Sciences

Bachelor of Computer Science with a Minor in Game Design

GPA: 3.883/4.0

Honors: Dean's List every semester, summa cum laude

Activities: Northeastern University Association of Gaming Enthusiasts, NU Game Development Club

Relevant Courses: Object-Oriented Design, Programming Languages, Logic and Computation, Algorithms & Data, Fundamentals of Software Engineering, Web Development, Compilers

New College of the Humanities at Northeastern University, London, England

September 2021 - December 2021

Technical Skills

Software: Visual Studio Code, Git, Unity, Visual Studio, GitHub, Google Suite

Languages: C#, Typescript, Java, C++, C, DrRacket, React

Personal and Academic Projects

Personal Website (<https://noah0young.github.io/>)

November 2024 – January 2025

- Developed a personal website using html and CSS to create a nice website with multiple webpages

Finely Tuned (Video Game)

February 2024

- Developed the game with a friend using Unity and C#
- Programmed the game using object-oriented design and abstract classes, to avoid repeated code and create an extendable game
- Developed seven unique minigames systems that could each be used to make multiple minigame stages

Image Processor

October 2022 - December 2022

- Programmed an image processor in Java with a partner using the model-view-controller (MVC) design pattern
- Used the command design pattern to add filters to images
- Developed a UI using the Swing library that allowed the user to edit multiple images at once

Interests: Game development, Fencing, Drinking tea, Food, Running
